

OKA JumpFlex

JumpFlex. Ergonomisch flexibel.
JumpFlex. Ergonomic flexible.

Der Tradition verpflichtet - Made in Germany

// OKA JumpFlex - Der ergonomische Weg zum flexiblen Arbeiten. JumpFlex unterstützt die flexible Arbeitsplatzgestaltung von Heute und ist speziell für den Einsatz in Seminarräumen, Coworking Spaces oder Mehrzweckräumen konzipiert. Eine Kombination aus elektromotorischer Höhenverstellung und mobilem Klappstisch ermöglicht eine hohe Flexibilität bei Berücksichtigung ergonomischer Belange. Sobald Platzbedarf besteht, ist die Tischplatte mit einem Handgriff zurückgeklappt und kann platzsparend zusammen mit weiteren JumpFlex Tischen verstaut werden. Durch die zusätzliche Möglichkeit der Untertischelektrifizierung und Kabelorganisation erfüllt JumpFlex alle Anforderungen für die Ausstattung eines vollwertigen Arbeitsplatzes.

// OKA JumpFlex - The ergonomic way to work flexibly. JumpFlex supports today's flexible workplace design and is specifically designed for use in seminar rooms, coworking spaces or multi-purpose spaces. A combination of electromotive height adjustment and mobile folding table allows a high degree of flexibility with consideration of ergonomic concerns. As soon as space is required, the tabletop is folded back with one movement and can be stowed away with other JumpFlex tables to save space. Due to the additional possibility of under-table electrification and cable organization, JumpFlex meets all the requirements for equipping a full-fledged workstation.

// Schnellklappfunktion
// fast folding function

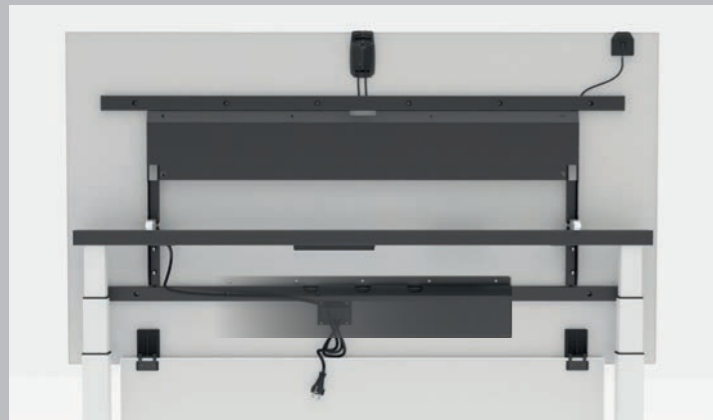

// Abklappsicherung
// folding safety catch

// 360° Lenkrollen bremsbar
// 360° castors with brake
